

# Micro-Vault™

## Lightweight & MEGAcrete

### UL Vault - Class M, 1, 2 & 3

- Custom Sizes
- Small commercial spaces or residential applications
- Greater usable volume than safes
- Can be designed for general storage or specialty items including guns or records.

**“** Bank-Tec South has been building vaults for over 20 years for the Financial industry. We have used over 6 vendors in that time frame, but with the technique that International Vault forms their panels, and the management they have on staff, our vaults are always the size we design and they fit tightly together for a beautiful finished product. I highly recommend them.”

~ Lee Berry
